

BYD MINI ES BATTERY SHUT DOWN - REBOOT PROCEDURE

If you find that your essentials are without power, please complete the following:

Flashing Lights

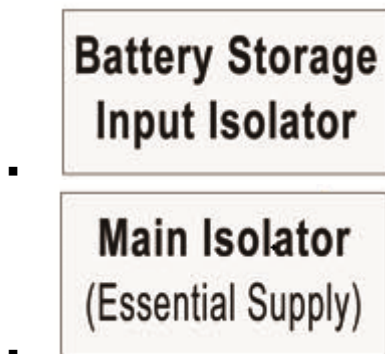

- PRESS and HOLD the power button on the BYD Mini ES for until the power light goes off
- Please turn OFF the following:

- Wait approximately 20 seconds
- Turn both of the isolators back to the ON position
- PRESS and HOLD the POWER button for 10 seconds. The BYD Mini ES battery will begin to power up. It may take 2 or 3 minutes for the lights to become “steady”.

No Lights

- Please turn OFF the following:

- Wait approximately 20 seconds
- Turn both of the isolators back to the ON position
- PRESS and HOLD the POWER button for 10 seconds. The BYD Mini ES battery will begin to power up. It may take 2 or 3 minutes for the lights to become “steady”.

***NB:** It has also been found that shutting down the battery and rebooting it will more often than not, bring the monitoring back online.*

If you continue to experience difficulties, please call our

BYD after hours' number 1300 027 077.
